BASIC RULES

Aim bubbles with the D-PAD,
and fire them with the A,
B, or C BUTTONS*.

(*You can alter these button settings
in the OPTION Screen.)

Pretty simple, eh? So simple that you're
free to concentrate on playing instead of
learning a bunch of rules and controls. Heck, you don't even
need to look at the rest of this manual. But I'd appreciate it
if you did. Keep me in good with the boss, y'know?

OBJECT OF THE GAME:

- The idea is to burst colored bubbles by linking
any three bubbles of the same color.

- The game is over
once a bubble gets
crowded over the
bottom line.

- To be a top scorer,
you've got to bust
as many bubbles as
possible! But the
real trick here is

learning how to strategically angle your shots.
Only a lot of practice will hone your aim, end
your shame and assure your fame!

EDIT MODE

When you choose the Edit Mode in the Game Select screen, it will take you to the Edit screen, where you can create your own great bubble puzzles--up to 30 of them! (See page 15 for details.)

GAME MODES

"Bust-A-Move 2X and Bust-A-Move 2 offer different screens/maps for twice the challenge! Just when you think you've got the game mastered, there's a whole nother one! Check out Puzzle Game, Player Vs Computer and Player Vs Player modes--is there such a thing as too much fun?"

PUZZLE GAME

Choose the Puzzle Game mode and you've got a ton of excitement on your hands! Work your way through the alphabet, as the puzzles get tougher and tougher to solve!

The right move at the right time is the difference between earning a quick time bonus and being buried alive in bubbles! An unexpected strategy may work wonders! After you select Puzzle game, you will be taken to the Level Select Screen. After choosing the difficulty level, you will find yourself on the Course Selection Screen.

- Each lettered course consists of five screens. Master all five and you go on to the next set of five.

- Choose your course with the D-Pad, then press the A BUTTON.
- When you have finished the last round, you have completed the game. Good luck!

CONTINUE: When a bubble sinks below the dead-line, the game is over. If you have any credits remaining, you can resume playing the game from where the game ended by simply pressing the START BUTTON during the CONTINUE count-down.

SPECIAL BUBBLES

There are Special Bubbles that can show up at any time, either in the bubble frame or in your shooter cue.

Use your head when aiming them—they can really help! Different bubbles show up depending on what game mode you choose.

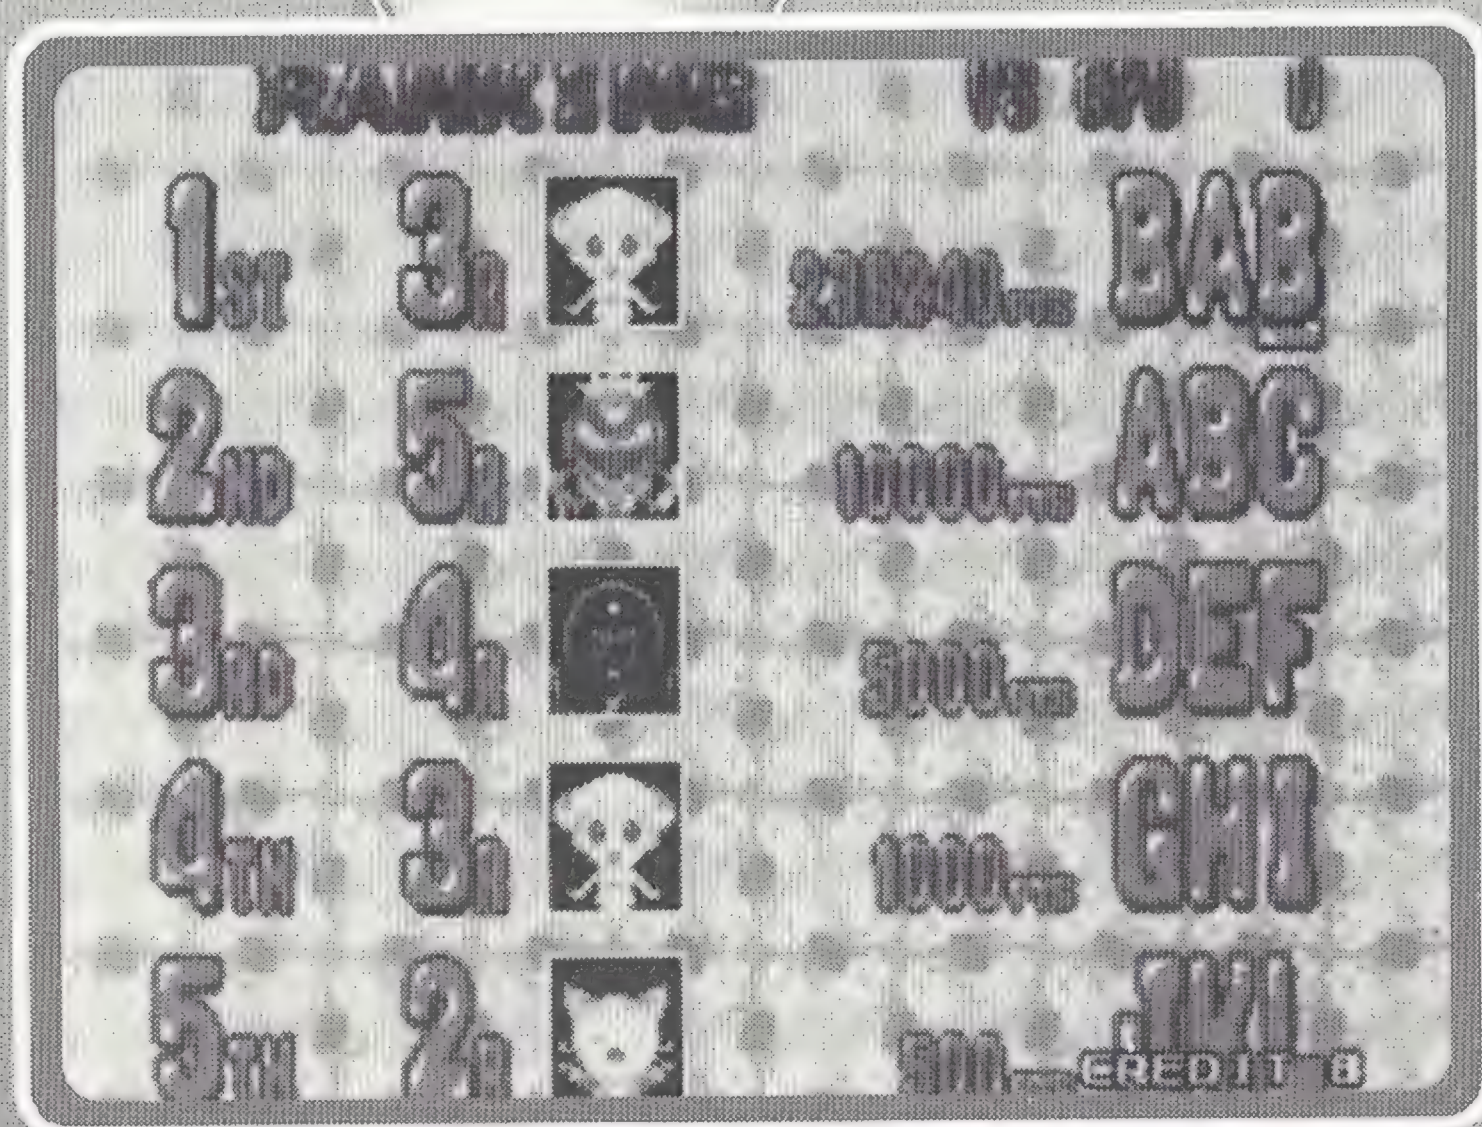

Star Bubble: The Star Bubble bursts all the bubbles of the color it first touches. For example, if it strikes a red bubble first, all the red bubbles will be eliminated. It has no effect on other Special Bubbles.

Metal Bubble: This heavy Metal Bubble destroys all bubbles it touches on the way to the top.

Jama Bubble: You can't bust this one! You must drop it by busting its neighbors.

Jama Block: This block will never disappear! You can't drop it, because bubbles stick to it!

NAME ENTRY:

When your score in a Puzzle Game or Player Vs. Computer game is among the best scores, you can choose and enter up to three

characters. Press LEFT or RIGHT on the D-Pad to toggle to the letter you want, then enter it by pressing the A BUTTON.

PLAYER VS COMPUTER

When you choose Player Vs. Computer in the Mode Select Screen, you will be taken to the Level Select Screen.

(When the Timer reads 0, the level will be set wherever the cursor is stationed at that time.)

- **Practice:** A practice game is just three rounds, with the aiming pulsor guides ON.
- **Normal and Hard:** Normal and Hard levels feature 12 screens in total.

RULES FOR ONE PLAYER VS COMPUTER

This is a Do-Or-Die scenario. When you defeat one computer opponent, the next challenger will appear. If you are defeated, the game is over.

Bust enough bubbles at the same time and you can dump them on your opponent's side — the ultimate move!

HERE COMES
A CHALLENGER.

PLAYER VS PLAYER

When you select Player Vs. Player, you will be taken to the Level Select Screen. After choosing the game level, the game will start. The player who wins the number of games set at the OPTION Screen will be the champion. As in Player Vs. Computer, you can jettison bubbles into your opponent's field.

Practice: Practice against a live opponent, using the aiming pulsor.

Normal: This level is the default—it's tough, but not too tough.

Variety: Try this level for an awesome strategic challenge!

EDIT MODE

When you select Edit Mode in the Game Selection screen it will take you to the edit menu screen. Choose **Make A Map** to create a new map or edit an old one. To play a previously saved map (or series of maps), select **Play**.

PLAYING THE SCREEN YOU MADE:

Basic rules are the same as in a Puzzle Game. There are six courses, A-F, with five rounds per course. Once you clear an entire course, you are taken to the Course Selection screen and transferred to the next course. Upon completing the F-course, the game concludes.

Unless you make all thirty screens in advance, the game will conclude at the time all self-made courses have been beaten.

HOW TO MAKE A PUZZLE SCREEN:

Place bubbles on the field wherever you like to create an original screen. Try writing words with bubbles, making wild patterns--let your imagination run wild!

In total, you can save up to thirty (30) original screens.

1. Choose Make A Map and finalize the selection.

2. Move the cursor with the D-Pad to position the bubbles.

3. Choose bubble types from the toolbox using the L/R Shift Button. (The R bubble will make the color of the bubbles random)

4. Press the A or C Button to set the bubbles; you can delete them with the B Button.

*You cannot test play on a screen of only a JAMA Bubble and JAMA Block, or on a screen in which there are no bubbles touching the ceiling. (In the event that such a screen appears in Play mode, the game will summarily conclude.)

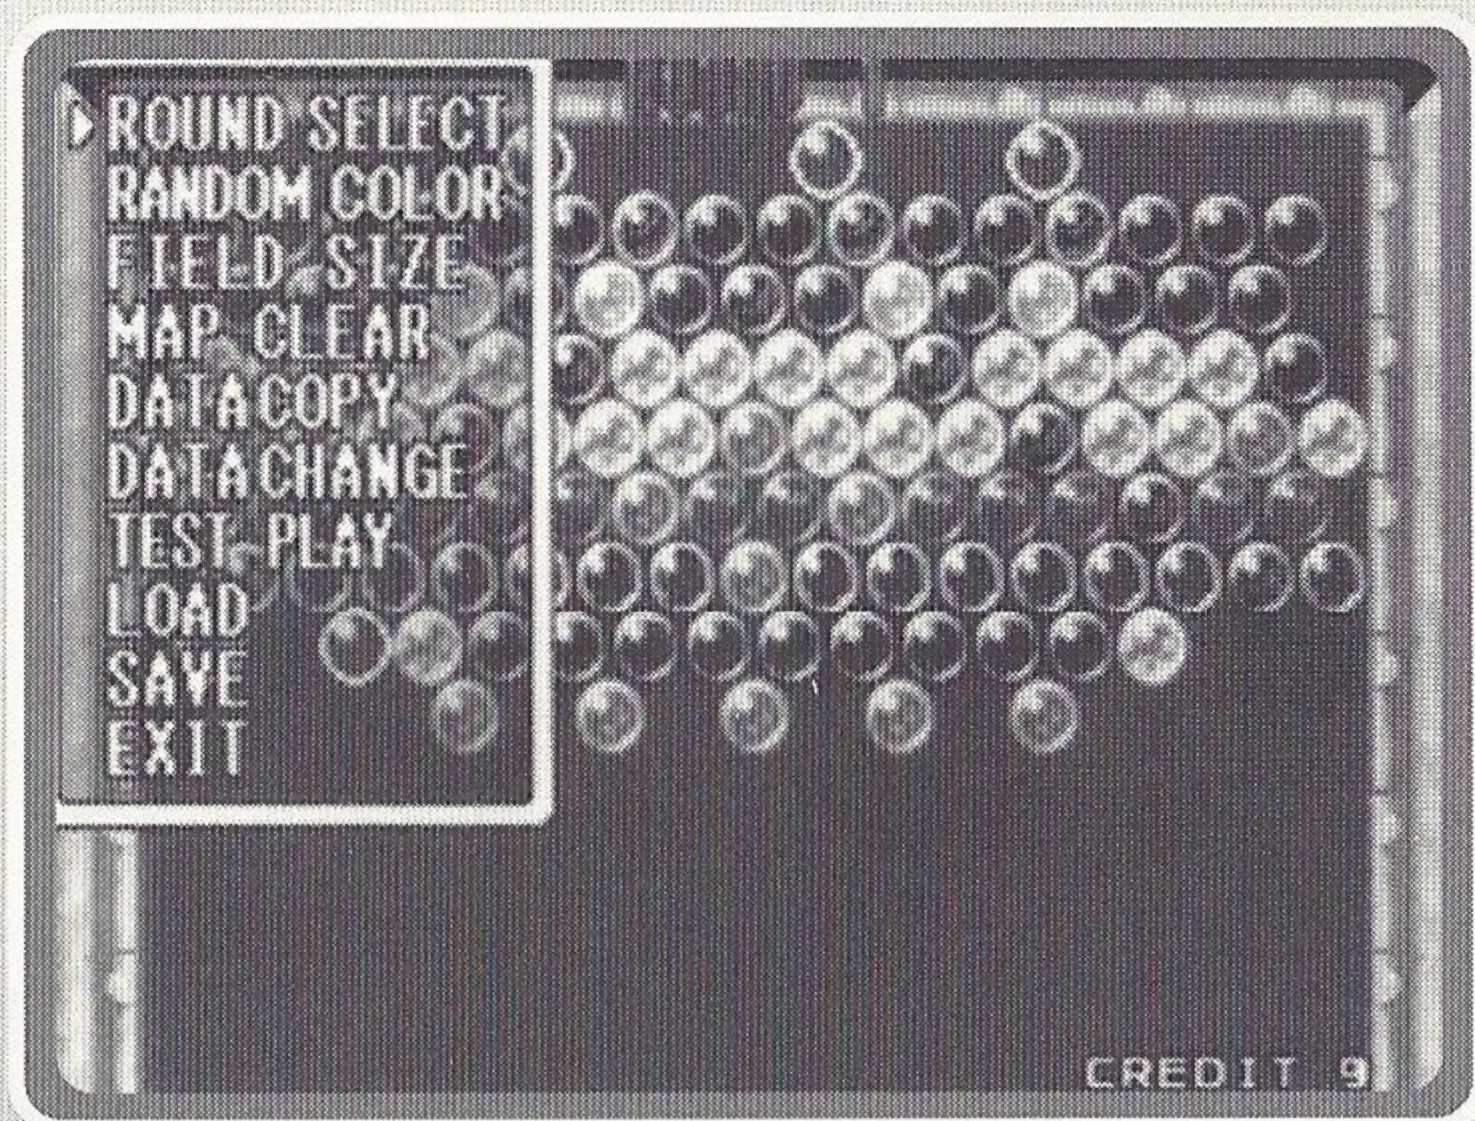

EDIT MODE OPTIONS:

When you press the Start Button in the Make A Map screen, the Edit options window appears. To select or deselect an option, press the A or C BUTTON. Toggle settings with the D-PAD. If you make a mistake or wish to return to the option window without completing an option function, press the B BUTTON.

ROUND SELECT: Select the rounds to be constructed.

RANDOM COLOR: You can set random color.

You can choose the color of a displayed bubble via the ON/OFF Button. (you cannot choose OFF for all colors)

FIELD SIZE: When you select field size and finalize your selection, press the A or C Button to toggle between wide and narrow fields.

MAP CLEAR: This will delete all the bubbles that are placed in the field.

DATA COPY: Use this to Copy map data from one round to another.

DATA EXCHANGE: Exchange map data with the designated round's edited data.

TEST PLAY: You can test play a round while editing (the one that is currently being shown). If you clear the round or lose the round you will return to the Edit screen. To return to the Edit screen during test play, press the X Button.

LOAD: Loads saved Edit Data (1st~30th screens).

SAVE: Saves data (1st~30th screens) that has been edited.

EXIT: Return to Menu Screen.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
